"Word problems involving sequences"

The following algorithm gives the rules:

Start
  Three players A, B, and C per group
  Own list of 4 independent exercises
  A sheet of paper, a pen, and a calculator per player
  For i = 1 to 4

      read and **solve** Ex i

      Player A **introduces his problem** to the others (reads the question, rephrases, …)

      Player A **explains** his solution :

- Introduce precisely the required sequence
- Use as much specific vocabulary as possible

      Players B and C **comment**, try to **improve**, **give advice**.

      Switch roles

  End
  If the team has more time

      Then ask for more problems !

  End
End at …h …
